DETAILED ACTION

1. This Office Action responds to Applicant's amendment filed on 10/16/2006.

Claims 1-22 are pending. Claims 1-22 have been examined and are allowed.

Allowable Subject Matter

2. **Claims 1-22** are allowed.

3. The following is an examiner's statement of reasons for allowance:

As per **claims 1-22**, the independent claims 1,8,16, from which the respective claims depend, recite the system/computer implemented method/program product stored on a recordable medium, for positioning I/O pads on a chip comprising the inventive steps/features of implementing a corrective action if the calculated group switching current exceeds the predetermined maximum switching current as claimed. In particular, although **G. Yasar et al.** ("I/O Cell Placement and Electrical Checking Methodology for ASICs with Peripheral I/Os", IEEE 2001, 2001 International Symposium on Quality Electronic Design, 26-28 March 2001, pp. 71-75, especially sections 3.1.2-3.1.3) teach the calculation of electromagnetic current for the groupings of I/Os for rule checking, this grouping of the I/O is not taught to apply to the switching current analysis nor does this grouping necessarily includes at least one power pad for each set of I/O pad groups, as claimed. In addition, as pointed out by Applicant, **Chiu et al.** (U.S. Patent No. 6,584,606) has been disqualified as prior art under 103(c) (see Applicant's amendment filed on 10/16/2006, page 7). Other prior arts made of record similarly failed to teach or suggest the inventive features as claimed.

Conclusion

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
